

## Qi Liu

---

CONTACT INFORMATION	School of Computing National University of Singapore Linkedin: <a href="https://sg.linkedin.com/in/leuchine">https://sg.linkedin.com/in/leuchine</a> Github: <a href="https://github.com/leuchine">https://github.com/leuchine</a> Homepage: <a href="http://qiliu.tech">http://qiliu.tech</a>	+65 98261235 <a href="mailto:qiliu@u.nus.edu">qiliu@u.nus.edu</a>
RESEARCH INTERESTS	Natural Language Processing, Machine Learning, Deep Learning, Data Mining and Blockchain.	
EDUCATION	<b>National University of Singapore</b> , Singapore  Master of Science, Computer Science, 2014 - 2016 <ul style="list-style-type: none"><li>• Thesis: <i>Automatic Annotation Management Through Document Enrichment and Transfer</i></li><li>• GPA: 4.07/5</li></ul> <b>Shandong University</b> , China  Bachelor of Engineering, Computer Engineering, 2010 - 2014 <ul style="list-style-type: none"><li>• Thesis: <i>Big Data Parallelization Techniques and Applications</i></li><li>• GPA: 84.7/100</li></ul>	
RESEARCH EXPERIENCE	<b>Research Intern</b> , Microsoft Research, Cambridge Machine Intelligence and Perception Group <b>Research Assistant</b> , Temasek Lab, SUTD, Singapore Advisor: Prof. Yue Zhang <b>Research Intern</b> , Microsoft Research, Beijing Advisor: Dr. Ying Yan, Dr. Thomas Moscibroda <b>Data Scientist</b> , Holmusk, Singapore <b>Teaching Assistant</b> , National University of Singapore Advisor: Prof. Tan Chew Lim, Prof. Tan Kian Lee <b>Research Assistant</b> , SeSaMe Research Centre, NUS Advisor: Prof. Anthony Tung, Prof. Mohan Kankanhalli <b>Research Intern</b> , Chinese Academy of Sciences, China	2018.04 - 2018.07 2017.02 - 2018.04 2016.09 - 2016.12 2015.04 - 2015.10 2015.08 - 2016.03 2014.12 - 2016.05 2013.07 - 2013.10

#### PAPERS IN PREPARATION

1. **Qi Liu**, Ying Yan, Yang Chen, Thomas Moscibroda. “ConsortiumDB: A Consortium Cloud Database with Smart Contract”. Submitted to VLDB
2. Zhengguang Liu, **Qi Liu**, Li Cheng. “LieGroup-LSTM: 3D Articulated Fish Pose and Trajectory Prediction from Depth Images”. Submitted to IJCAI.
3. Yue Zhang, **Qi Liu**, Linfeng Song. “mLSTM: An Efficient and Effective Neural Architecture through Message Passing”. Submitted to ACL.

#### PATENT

1. **Qi Liu**, Yang Chen, Ying Yan, Thomas Moscibroda. “A Programmable SmartContract Defined Database.” (US patent, filed date 17/03/2017, Part of the project [Microsoft Coco](#))
2. Zhengguang Liu, **Qi Liu**, Butian Huang. “Automatic SmartContract Categorization with Neural Network.” (CN patent, filed date 17/12/2016)

#### AWARD

Lee Kuan Yew Global Business Plan Competition Winner (3 out of 550)	2017
Microsoft Star of Tomorrow Excellence Award	2016
ACM SIGMOD Travel Grant	2015
Winner, Predict Exacerbation in Patients with COPD, CrowdANALYTIX	2015
Winner, Changing the Landscape of Healthcare in US, CrowdANALYTIX	2015
NUS Research Scholarship	2014 - 2016

#### SERVICE

**Secondary Reviewer**, NAACL, 2018  
**Secondary Reviewer**, AAAI, 2018  
**Reviewer**, Neurocomputing, 2017  
**Reviewer**, Multimedia Tools and Applications, 2016

TEACHING	CS5344 Big Data Analytics Technology, 2015/2016 semester 2 CS3244 Machine Learning, 2015/2016 semester 1
SKILLS	<b>English:</b> Toefl: 104 (R29, L27, S22, W26), GRE: 329 (V159, Q170, AW3.5) <b>Programming:</b> Python, Java, C/C++, Javascript <b>Toolkits:</b> Tensorflow, Hadoop, Spark, Git, MongoDB, MySQL, LaTeX
PROJECT	<p><b>Readpeer for social reading:</b> A social reading and online annotation system implemented in Java Spring framework. People can make and share annotations on the system. The system can also enrich the documents automatically with social media feeds like tweets.</p> <p><b>Discharge summary drug-ADE relationship extraction:</b> Classify whether the drug causes the adverse effect. The accuracy on drug-AE relationship is 80%. The project is in collaboration with Singapore Health Sciences Authority.</p> <p><b>Blockchain as a service:</b> I build a consortium blockchain database with smart contract on Microsoft Azure in Python. The system is efficient, secure, immutable and verifiable. Also, the system can cater a wide range of applications.</p> <p><b>A basic HTTP server that supports HTTP/1.1 in C++:</b> Can handle at least 10,000 concurrent connections and serve at least 100,000 requests per second on a modern personal computer.</p> <p><b>Indoor positioning based on image features and geomagnetic signals:</b> I use convolutional neural network to extract image features and mobile phones to collect geomagnetic signals. Particle filtering are adopted to perform predictions. The final accuracy is 89.3% on the test dataset.</p> <p><b>Predict Exacerbation in patients with COPD:</b> An online competition in CrowdANALYTIX. I perform some preprocessing procedures such as onehotencoding, Chi Square test and use SVM with RBF kernel to solve the challenge. We are the winner of this online competition.</p>
COURSES	Computer Architecture, Java, Discrete Mathematics, Middleware Technology, Numerical Computing, Algorithm Analysis, Computer Networks, Linux Kernel, Software Engineering, Machine Learning, Operating System, Database, Compiler, Data Mining, Distributed System, Data Mining, Speech Processing, Probabilistic Graphical Models, Optimization, Linear and Integer Programming, Matlab, Convex Optimization, Data Visualization, Convolutional Neural Network, Mining Massive Datasets, Natural Language Processing, Parallel Programming With CUDA, Analytics Edge, Artificial Intelligence, Deep Learning for Natural Language Processing
